HYPERION INTELLIGENCE

EASY-TO-USE TOOLS FOR SOPHISTICATED QUERY AND ANALYSIS.

In today's business environment, knowing what makes your business successful and why is critical to driving performance. Many companies with established production or transaction systems already have this information, but without sufficient means to analyze it, they fail to unlock its true business value.

PRODUCT OVERVIEW

For sophisticated query and analysis, Hyperion® Intelligence is the most advanced and easy-to-use set of tools available. Leveraging data from existing enterprise information systems, Hyperion Intelligence provides information developers, analysts and consumers with the ability to make raw data useful for decision making. Supported by an intuitive, Web-enabled dashboard interface, everyone across the enterprise can benefit from the analyses and reports created. Delivering business-critical information, not just data, Hyperion Intelligence drives an interactive understanding of business opportunities and trends, empowering employees to make optimal decisions.

PRODUCT BENEFITS

Ease-of-use. Encourages fast user adoption and improves interactive understanding of business-critical information across the entire company.

Business performance focused. Provides an interactive, dynamic intelligence solution for different classes of users, from simple to complex, including content viewers, analysts and developers.

Enterprise-class scalability. Integrates with and leverages almost any existing information source to establish a scalable, standards-based environment for developing business intelligence solutions.

Secure. Provides safe exchange of business information through the ability to secure content to different users across the enterprise.

Rapid deployment. Administers easily for fast deployment and lower cost of support.

KEY PRODUCT FEATURES

Flexible metadata use and creation. The open metadata interpreter and optional semantic layer give you more flexibility in designing your deployment to include transactional systems, data warehouses and data marts with minimal administrative overhead.

Extensive data source support. Supports queries to relational, multidimensional and operational databases from all popular vendors, including Hyperion® Essbase®, Oracle, DB2, SAP, Sybase, PeopleSoft, Siebel and others.

Native support. Supports an extensive range of data sources including Oracle (including Stored Procedures), DB2 (including Stored Procedures), DB2 for OLAP, Hyperion Essbase, Sybase, Red Brick, MS SQL Server and MS Analysis Services. Native database drivers optimize performance.

Hyperion® Intelligence delivers business-critical information, driving an interactive understanding of business opportunities and trends.

HIGHLIGHTS

Sophisticated query and analysis

Highly intuitive user interface

Supports all user types

Fastest to deploy and scale

Easy to administer and support

Scalable, reliable architecture. Includes load balancing and fail-over support across server clusters.

Integrated. Business intelligence application development, query and online analytical processing (OLAP) functionality integrated into a single product.

Custom data models. Allows administrators and developers to create master data models.

Flexible, graphical development environment. Enables developers and analysts to build dynamic, customized information dashboards for all levels of the organization.

Consistent content. Provides automatic database synchronization to distribute repository changes to all users without requiring IT intervention.

Web and client/server enabled. Integrates query and analysis capabilities within Web and client/server environments for online and offline relational and multidimensional OLAP analysis.

Role and database-level security. Role-based access control establishes user permissions, allowing you to control and delegate administration, while promoting collaboration.

Comparative analysis. Incorporates information from multiple data sources into one document for side-by-side, relational analysis.

Flexible analysis. Supports both pre-defined and "drill anywhere" paths.

HYPERION SERVICES — SUPERIOR PRODUCT AND INDUSTRY EXPERTISE

Hyperion's global services organization provides comprehensive consulting expertise, technical support and staff education for rapid, successful implementation of Hyperion products. With 20 years of experience and thousands of satisfied clients, Hyperion's services organization delivers superior customer service.
